Therefore, estimated expenditure on salary of employees was calculated during the year 2006-07. First of all mid-value of the pay scale has been taken as its basic pay and was multiplied by the total No. of employees (as on 31<sup>st</sup> March) to get total monthly basic pay. The total medical allowance is worked out by multiplying the total No. of govt. employees with fixed medical allowance. To get total dearness allowance first of all the dearness allowance given during the financial year 2006-07 is added then total is divided by 12 to get one month average rate of dearness allowance and thereafter multiplied by total basic pay of each pay scale. To get total monthly pay of one pay scale column No.7, 8, 9 were added and multiplied by 12 to get estimated annual expenditure on salaries of that pay scale. Thus total estimated monthly expenditure on salaries of 345537 govt. employees was Rs. 352.88 crores and annual expenditure was Rs. 4234.59 crores for the year 2006-07.
